

S-K Industrial Supply is a specialty electrical distributor and leading supplier of premium electrical products and solutions to the Oil, Gas, Chemical, Pipeline, and Engineering Industries.

S-K Industrial Supply provides the best solution for your application by working synergistically with key manufacturers and a network of S-K Industrial Supply business partners.

S-K Industrial Supply offers assistance to its clients from budgetary proposals through final design and purchase of specific materials.

S-K Industrial Supply takes great pride in its willingness and ability to provide much more than the services offered by standard electrical distributors.

S-K Industrial Supply's management team brings over 100 years of combined experience that our customers have come to rely on. Our knowledge and experience give us the advantage when providing professional products and services to growing companies as well as those that are well established.

If S-K Industrial Supply cannot solve your problem, we will assist you with finding a provider that can. This is our commitment to you, our client.

Please see our Line Sheet for a non-exhaustive list of some of our manufacturing partners.

S-K Industrial Supply

4501 Magnolia Cove Drive, Suite 201 Kingwood, Texas 77345

281-999-3300

Fiberglass reinforced non-metallic electrical boxes and enclosures.

ASCO is the worldwide leader in the design and manufacture of quality solenoid valves.

Advanced controls and drives from the world leader in mission critical motor control and protection.

Exothermic welded electrical connections that will never loosen corrode or increase in resistance.

ERICO is a leading designer, manufacturer and marketer of precision-engineered specialty metal products serving global niche product markets in a diverse range of electrical, commercial and industrial construction, utility and rail applications. ERICO is a world leader in lightning protection systems.

Niagara Transformer

Niagara has established a worldwide reputation as a supplier of liquid-filled, ventilated dry-type and sealed dry-type transformers.

Omni Cable Corporation is a leading supplier of electrical, electronic and other specialty cables.

Only Raycap's Strikesorb[®] transient voltage surge suppression (TVSS) technology can provide uninterrupted protection from damaging lightning strikes and surge currents.

R. STAHL offers an ever-expanding array of products defining the finest qualities of explosion protection. Their products represent safety technology at its highest level.

The Industrial Division is a world leader in the design and manufacture of motors, motor controls and power electronics products.

Federal Signal Corporation is a global leader of communications, safety and security products for process control, plant-wide safety, offshore, marine and industrial facilities.

The Hubbell Wiegmann name has become synonymous with traditional NEMA enclosures, JIC enclosures, non-metallic enclosures, aluminum enclosures, and wireway systems.

HPS is a leading manufacturer of dry type transformers and related magnetic products.

Killark is a leading manufacturer of electrical construction products for standard, harsh and hazardous environments.

MIRUS International Inc. is a leader in the design and manufacture of high efficiency harmonic mitigating products for electrical power distribution systems.

Moeller is a world-renowned, full line manufacturer of industrial electric and electronic controls and systems. They have earned a worldwide reputation for high quality engineering and ecologically sensitive manufacturing of components, engineering assemblies and enclosures.
